TARGETED NUTRITION FOR TURF

Bullet Magnesium

Contains: 5%MgO +2.2%N
Treats: 10,000m²

A highly complexed formulation of magnesium purposely formulated to encourage rapid leaf uptake and maximum plant availability. Magnesium is important within the process of photosynthesis and enzyme production.

Concentrated form of magnesium, the central element of the chlorophyll pigment, to provide green-up in situations where there is already ample iron or in acidic soils where the grass is exhibiting signs of magnesium deficiency, or where demand for magnesium has been increased i.e. potassium has been raised or a pH amendment has been applied.

Application:

Apply at a rate of 5 litres per hectare in 200 litres of water. Apply evenly, avoid overlapping or missing areas, using a suitable calibrated sprayer. If there is no rain within 2 days of application irrigate the treated area thoroughly.

Do not apply in hot, dry weather or frosty conditions. Half fill the sprayer with clean water. Add concentrate as required and mix thoroughly whilst adding remaining water.

Applicator	Application rate	Water volume	Pack size	Pack coverage
Boom sprayer	5l/ha	200l/ha		
Knapsack	0.5ml/m ²	20ml/m ²	5l	10,000m ²

Ingredient	Oxide value	Elemental value
Total nitrogen (N)		2.20%
Nitrate (NO ₃)		2.20%
Phosphorus pentoxide (P ₂ O ₅)	0.00%	0.00% P
Potassium oxide (K ₂ O)	0.00%	0.00% K
Magnesium (MgO)	5.00%	3.02% Mg
pH	3.5-4.5	

Nutrient analysis stated as w/v

Manufactured without the use of chlorides

EUH208 contains reaction mass:

5-chloro-2-methyl-4-isothiazoline-3-one and 2-methyl-2-isothiazole-3-1 (MAY PRODUCE AN ALLERGIC REACTION)

This product is not classified as hazardous for supply or for transport. Please refer to the associated safety data sheet for information and guidance on safe transport, handling, use and disposal of this product.
